Pneuvac Pump Sets

Stainless Steel
Code 217843

Aluminum
Code 217844

\$946.10

\$713.05

The Royal Pneuvac pump is a simple, low-cost device that generates a strong vacuum when compressed air flows through its internal venturi.

All you have to do to operate the unit is:

- Connect the pump and hose to a standard 55-gallon steel drum
- Hook up a compressed air supply to the pump
- Drop the free end of hose into the coolant
- Open the air valve
- Coolant and sludge is drawn through the hose and deposited into the drum – quick, clean, and hassle-free

Removing old, rancid coolant from machine tool coolant sumps has always been a dirty, time-consuming job – but now it doesn't have to be. The Royal Pneuvac Pump allows you to clean your sumps quickly, safely, and easily!

Set includes:

- 1/4" ball valve
- Automatic shut-off valve
- 10 ft. of smooth-bore hose
- Quick-disconnect drum fittings
- 18" aluminum wand

CAUTION:

1. Do not use the Pneuvac pump with flammable or volatile liquids such as gasoline, alcohol, kerosene, aviation fuel, mineral spirits or any similar liquid with a low flash point
2. Do not modify this product to pressurize drum to pump liquids out. Pressurizing drum could cause an explosion that may result in serious injuries

Tool Holder Bushing Sets

CNC Bushings – Type C – Black Oxide Finish

- For use on all NC and CNC turning machines to adapt a wide variety of boring bars, drills, reamers and other round shank type tools
- Heat treated and precision ground
- C bushings have long slots for clamping directly on the tool for positive alignment of the cutting edge of the tool
